## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Karpinski.

Karpinski teaches all the limitations of Claims 1-26. For example, Karpinski discloses a web based package-tracking system that offers a means for managing tracking systems of multiple overnight mailing couriers simultaneously, allowing a user to generate a tracking request for a package using sophisticated agents and server technology that allows an air bill to be entered once and have the system return the information when found.

Karpinski also teaches the application of E-mail/paper-message service that will be managed over the Internet and an agent application that sends out requests in the form of scripts to the various carrier sites. What comes back is an HTML string that the system parses into records that get placed in a database and then can be accessed locally by the application. (See entire article)
